WELCOME

Dear Attendees,

Welcome to the 2nd edition of **Mining Critical Minerals & Clean Energy India** Conference & Exhibition. We are honoured that you can join us here at this event dedicated to critical minerals and clean energy.

Here in India, supply of critical minerals is a matter of strategic importance. But, India is import-dependent for these minerals, leaving it vulnerable to global supply disruptions and geopolitical risks. Over the last few years, the Indian government has made notable progress in the introduction of forward-looking policies. The National Critical Minerals Mission aims to address the entire supply chain, from exploration to domestic production to recycling, reflecting the government's commitment to reduce import dependence. New royalty rates for mining of 24 critical and strategic minerals were approved to encourage both mining and private sector participation. Auction of onshore and offshore critical mineral blocks by the Ministry of Mines, and the move to fully exempt critical minerals from custom duties are also expected to further boost industry growth.

Globally, critical minerals continue to be the battleground for global powers due to its strategic importance for sectors such as defence and technology. We will be examining some of these geopolitical challenges at this event. Besides that, investment trends, capital raising, exploration opportunities, new technological developments and international collaboration will also be discussed at the conference. We hope you can build on the diversity of attendees from various industries across India and beyond to make excellent connections and forge new business opportunities.

This event in Mumbai is part of our global Energy Transition, Critical Minerals and Mining Investment Conference Series. To date, this Conference Series have been held in Singapore, Japan, Australia, UK, Brazil, Canada and USA. We also organise MiningTech Conferences in Vancouver, Canada and Sao Paulo, Brazil. Globally, our events cover Africa, Australia, Asia, Latin and North America and Europe. If you are interested to find out more, you can browse at our website www.spire-events.com.

In closing, we hope you will make many meaningful connections over the formal and informal conference and networking sessions and have a great Mining Critical Minerals & Clean Energy India Conference and Exhibition experience ahead.

Yours sincerely,
Daniel Radziszewski

SPONSOR, PARTNERS & EVENTS SPOTLIGHT

BRONZE SPONSOR

SciAps

a powerful combination

Malvern Analytical is a leading global organization in the field of scientific instrumentation, with a strong presence across India's mining and minerals sector and several recent key wins in this segment. This event is an excellent platform for us to share insights on the latest technological developments in mineral and rare-earth element (REE) analysis, focusing on quality control, improved recovery rates, and process efficiency – from exploration to mineral processing.

Our solutions enable precise elemental characterization, which is critical across the mining value chain – helping industries optimize operations and ensure high-quality final products.
